**The beautiful museum designed
by a world-renowned architect in harmony with the landscape**

The Yokosuka Museum of Art, designed by world-renowned architect Yamamoto Riken, is located in a natural setting with panoramic views of Tokyo Bay and forested Kannonzaki Park as a backdrop.

The building's exterior is designed to be in harmony with the surrounding forest and sea, while the view from the round windows within the museum is as beautiful as a painting that is acclaimed both in Japan and abroad as architecture.

Exclusive Programs

An exclusive tour by architect Yamamoto Riken and a meal with spectacular views

Special Program 1

Follow the museum's architect, Yamamoto Riken, as he shows you around and points out the highlights of the building. Learn about the concept of the design and his aim as an architect.

* If Mr. Yamamoto is not available, an assistant from his office will take his place.

Special Program 2

At Acquamare, an Italian restaurant adjacent to the museum, enjoy a specially prepared meal based upon your requests. It includes locally produced beef and vegetables.

* Dishes from the standard menu may be served if the restaurant is busy or there are other deciding factors.
